- Installing, maintaining and troubleshooting the SCADA system and associated equipment
- Manage controlling operations
- Testing, evaluating and repairing distribution transformers
- Substation inspections, transformer oil sampling and data gathering
- Generation of substation report
- Report hazardous condition to the Substation Operator
- Availability for afterhours work is required

#### **Skills:**

- Knowledge of OHSA, the EUSA Rule Book, and the Utility Work Protection Code will be considered assets
- Strong commitment to workplace safety
- Exceptional problem-solving skills and a collaborative approach in determining course of action
- Strong communication, customer service and leadership skills are essential
- Basic computer skills are required

#### **Minimum Qualifications Required:**

- Grade 12 Secondary School Graduation Diploma
- Previous exposure to electrical theory will be considered an asset
- Either a Construction and Maintenance Electrician Certificate (309A) or the successful completion of a Theory Qualifying Test is required
- Be prepared to attend and successfully complete the MEARIE Substation Electrician training and progress through Learner, Improver to Substation Electrician within six years
- Must obtain a Class "D" drivers licence
- Must obtain a "Z" Airbrake Endorsement
- Well-developed verbal and written communication skills

Must be capable of performing physical tasks in an outdoor environment 12 months of the year.

Interested and qualified applicants are encouraged to submit their resume to HR@northbayhydro.com by November 30, 2019. Please quote position title that you are applying for in the subject line of your email. Only the candidates who meet the qualifications and experience for the position will be contacted for an interview. North Bay Hydro Distribution Limited is an equal opportunity employer

*We thank you for your interest in North Bay Hydro Distribution Limited.*
