

## Vegetation Management 2024

North Bay Hydro continues their commitment to providing our community with safe and reliable power by performing their Vegetation Management obligations in the Downtown Area. This work involves the trimming and removal of trees up to 4.5m (15') away from hydro lines and is a vital maintenance activity to ensure that vegetation is kept at a safe distance from high voltage conductors and equipment.

Please feel free to contact North Bay Hydro regarding any questions or concerns you may have.
